AIRFLOW DIAGRAM

HARD DRIVE INSTALLATION

Remove the screws from the hard drive bracket after opening the right metal panel.

Take out the hard drive bracket.

Install the SSD from the front side of the hard drive bracket, then fasten the screws through the holes on the rear side.

Install the HDD on the rear side of the hard drive bracket, then fasten the screws through the side mounting holes.

POWER SUPPLY INSTALLATION

Remove the right side panel to reveal the PSU mounting position on the base.

Place the power supply on the base and align the mounting holes.

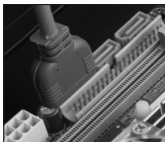

Fasten the screws through the rear metal frame.

USB 3.0 INSTALLATION (OPTIONAL)

Internal USB 3.0 connector
inside the case

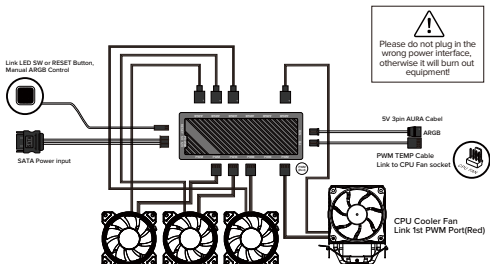

Plug it into the USB 3.0
header on the
motherboard

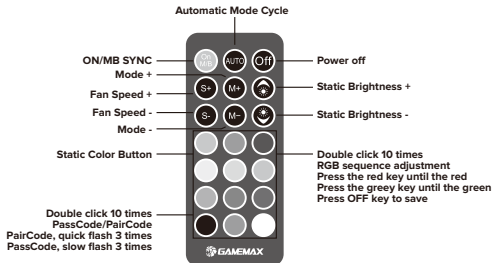

Front panel USB 3.0 port of the chassis
